By Appointment to  
Her Majesty The Queen  
Suppliers and Installers of  
Ultraviolet Filters and Traditional Blinds  
Sun-X (UK) Ltd, Bognor Regis

## *Market Leaders in Conservation*

SUN-X (UK) Ltd is one of Britain's oldest established window film and blinds installation specialists with an enviable reputation for quality. As such, we are very proud to bear the **Royal Warrant** as Suppliers and Installers of Ultraviolet Filters and Traditional Blinds to Her Majesty The Queen. As well as the company operating since the 1950's, our senior installers have been with Sun-X for over 25 years.

In addition to our range of museum-grade ultraviolet window filters to protect against sun damage to valuable furnishings and artwork, we supply and install a full range of safety/security, solar control, insulating, privacy, printed graphic and manifestation films. Most recently available is a very clear external grade non-reflective solar film, which is barely noticeable on the glass, but reduces solar energy by 66% on double glazing.

We can also offer the very latest in energy-saving window film technology. This range of 'Low-E' films offers year-round savings by reducing cooling loads in the summer, and heating bills in the winter by effectively upgrading single glazing to air-filled double glazing in terms of reducing heat loss by up to 44%. Payback over the warranty period can be as low as three years. This product is available in a few different finishes, including discrete options for listed buildings, and is much more cost-effective, environmentally friendly, and less disruptive than installing double glazing.

SUN-X is an Authorised Fitment Centre for the world's largest window film manufacturer, reaching the highest national standards for top of the range window film products, installation quality, contract management, and enhanced product warranty systems. Our numerous regular clients **throughout the British Isles** include: American Express, The London Stock Exchange, English Heritage and National Trust properties, Royal Residences, The British Museum, Government and MOD installations and County Councils, and major building contractors.

SUN-X also provide the complete service of traditional and modern sun blinds and curtains, expertly manufactured and installed by our own trained personnel. Notably, we have manufactured and installed large (seven metre drop) motorised roller blinds in a transparent sunscreen material to various new **Sainsbury's** stores.

We trust that this information is of interest to you, but should you have any further queries or current projects in mind, please do not hesitate to contact us. In the meantime, I assure you of my best attention and look forward to being of further assistance in the future.
