

# iEM360

Your Net Zero Partner

In an unprecedented rising energy market, iEM360 are a tactical business partner. iEM360 will help you save money by using less energy and generating more. Our innovative approach has already realised hundreds of thousands of pounds of customer savings, millions of kWh reductions and thousands of carbon tonnes removed.

## From 360 to Zero

Founded in the UK, iEM360 is committed to empowering businesses just like yours to use energy more efficiently. We do this by taking a 360° view of your current operations, to identify where improvements for energy efficiency and energy compliance can be made. We are backed by the Department for Business, Energy and Industrial Strategy (BEIS), offering an innovative solution that finances commercial energy efficiency projects for you - so you don't have to. We call this Energy as a Service (EaaS). A debt free, risk free, cost and carbon saving solution that brings you closer to your Net Zero commitments.

- Firstly, iEM360 assesses a business' opportunity for energy efficiency and energy compliance by using its bespoke Desktop Energy Optimisation Report (DEOR).
- We can then quickly establish the size and scope of the opportunity available for you, as well as the viability to progress to Stage Two.
- The DEOR has been developed in line with BEIS and is able to identify any legislative compliance that we need to consider to align you with your Net Zero goals.

## 6 Steps To Zero
